Notes to Interim Consolidated Financial Statements

U.S. Funds

For the Six Months Ended 30 June 2009

1. Nature of Business

The Company was incorporated in the Province of British Columbia, Canada on 27 February 2004. The Company is in the exploration stage and is in the process of exploring several mineral properties in the United States and Mexico. The Company has not yet determined whether these properties contain economic reserves. Effective 1 March 2006, the Company completed an initial public offering to list on the TSX Venture Exchange ("TSX-V").

The business of mining and exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of amounts shown for resource properties is dependent upon several factors. These include the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development of these properties, and future profitable production or proceeds from disposition of mineral properties. Also, the Company may have to raise additional funds for future corporate and administrative expenses and to undertake further exploration and development of its mineral properties. There can be no assurance that the Company will be able to raise sufficient funds in the future.

2. Going Concern

These financial statements have been prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. As at 30 June 2009, the Company has an accumulated deficit of \$9,613,144 (31 December 2008 - \$8,967,133) has no source of revenue, and has significant cash requirements to meet its administrative overhead and maintain its mineral interests. The Company's ability to continue as a going concern is dependent on its ability to raise equity financing and attain profitable operations.

These financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities and the reported revenues and expenses should the Company be unable to continue as a going concern.

3. Significant Accounting Policies

In the fiscal year ended 31 December 2008 the Company changed its accounting policy for resource property exploration costs. In prior years, the Company capitalized the acquisition costs of resource properties and deferred exploration expenditures directly related to specific resource properties, net of recoveries received. Under the new policy property exploration costs, incurred prior to the determination of the feasibility of mining operations and a decision to proceed with development, are charged to operations as incurred. Exploration costs also include exploration licence and maintenance fees which are paid on a yearly basis.

Development expenditures incurred subsequent to a development decision, and to increase or to extend the life of existing production, are capitalized and will be amortized on the unit-of-production method based upon estimated proven and probable reserves. Management believes that this treatment provides a more accurate depiction of the asset base of the Company prior to establishing the economic feasibility of its resource base. The Company also wishes to proactively adopt policies which are congruent with the treatment under International Financial Reporting Standards (IFRS), given the CICA's stated goal of IFRS convergence by 2011.

4. Significant Accounting Policies

These unaudited interim consolidated financial statements and the accompanying notes have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP") for the preparation of interim financial information. Accordingly, they do not include all of the information and disclosure required by Canadian GAAP for annual consolidated financial statements. The accounting policies used in the preparation of these unaudited interim consolidated financial statements are the same as those described in the audited consolidated

Notes to Interim Consolidated Financial Statements

U.S. Funds

For the Six Months Ended 30 June 2009

financial statements and the accompanying notes for the year ended 31 December 2008. In the opinion of management, all of the adjustments necessary to fairly present the interim financial information set forth herein have been made. These adjustments are of a normal and recurring nature.

Interim operating results for the period ended 30 June 2009 are not necessarily indicative of the results that may be expected for the full year ending 31 December 2009. These unaudited interim consolidated financial statements should be read in conjunction with the audited financial statements and related footnotes for the year ended 31 December 2008.

These financial statements have been prepared in accordance with accounting principles generally accepted in Canada, which require management to make estimates and assumptions that affect the reported amounts and other disclosures in these financial statements. Actual results may differ from those estimates.

The Company's significant accounting policies are as follows:

a) Basis of Presentation

These consolidated financial statements include the accounts of the Company and its significant wholly-owned subsidiaries:

- Premium Exploration U.S.A., Inc. ("Premium USA"), which was incorporated at nominal cost in the State of Nevada, U.S.A.
- Compania Minera Zorro de Plata, S.A. de C.V. ("CMZ"), which was incorporated at nominal cost in the State of Sonora, Mexico.

b) Resource Properties

Exploration costs, incurred prior to the determination of the feasibility of mining operations and a decision to proceed with development, are charged to operations as incurred.

Exploration costs include licence and maintenance fees which are paid on a regular basis.

All direct costs related to acquisition of resource property interests are capitalized, if, in the opinion of management, they have the nature of property, plant and equipment.

Development expenditures incurred subsequent to a development decision that increase or extend the life of existing production, are capitalized and amortized on the unit-of-production method based upon estimated proven and probable reserves.

c) Foreign Currency Translation

The accounts of the Company's U.S. and Mexican operations have been translated into Canadian dollars as follows:

- Monetary assets and liabilities at year-end rates,
- All other assets and liabilities at historical rates,
- Revenue and expense items at rates approximating those in effect at the date of the transaction, and
- Exchange gains and losses arising from these transactions are reflected in income or expense in the period.

The accounts are then translated into the U.S. dollar, being the reporting currency, using the current rate method as follows:

- Assets and liabilities at year-end rates,
- Revenue and expense items at rates approximating those in effect at the date of the transaction, and
- Exchange gains and losses arising from these transactions are reflected in equity as a cumulative translation adjustment.

d) International Financial Reporting Standards

In addition to the above accounting pronouncements the AcSB published, in 2006, a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The strategic plan outlines the convergence of Canadian GAAP with International Financial Reporting Standards (IFRS) over an expected 5 year transitional period. In February of 2008 the AsCB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canadian GAAP. The date is for financial statements relating to fiscal years beginning on or after 1 January 2011. The transition date of 1 January 2011 will require restatement for comparative purposes of amounts reported by the Company for the year ended 31 December 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

b) Chrome Mountain Property, U.S.A.

As provided by certain agreements and subsequent amendments, in prior years, the Company, through its subsidiary Premium USA, purchased 137 unpatented mining claims located in Sweetgrass County, Montana. These claims constitute the Chrome Mountain project. In order to complete the acquisition the Company issued 2,100,000 escrow shares (fair value \$172,000) from treasury, paid \$20,000 to one of the vendors and completed the required exploration expenditures on the properties. The Company has staked an additional 30 claims, which are contiguous to the 137 acquired claims.

c) Idaho Gold Properties, Idaho, U.S.A.

By a letter of intent dated 1 September 2007, the Company entered into an agreement to acquire the South Orogrande shear zone ("Orogrande") from Clearwater Mining Company ("Clearwater").

Notes to Interim Consolidated Financial Statements

U.S. Funds

For the Six Months Ended 30 June 2009

Under the terms and conditions of the letter of intent with Clearwater, the Company will acquire a 100% interest in Orogrande, subject to the following:

- Assumption of an underlying 1.0-per-cent net smelter return royalty on the Friday-Petsite property payable jointly to previous operators of the property that is capped at \$1-million.
- Assumption of an underlying 1.0-per-cent net smelter return royalty on the Dixie property payable jointly to previous operators of the property that is capped at \$1-million
- Assumption of all other obligations of Clearwater under various agreements with third party property vendors for Orogrande.
- Assumption of the yearly US BLM claim maintenance fees on the South Orogrande shear zone.
- In the event that the Company should vend or transfer all or part of Orogrande to a third party within one year, the Company shall pay Clearwater 25% of all cash and stock-based consideration that it receives in turn for making the transfer to the third party. In the event that the Company spends \$500,000 on developing the property and more than one year passes before the Company transfers all or part of the South Orogrande shear zone to a third party, then the Company shall pay to Clearwater \$200,000 and grant a 15-per-cent net profits interest in Orogrande to Clearwater.

d) San Pedro Analco Property, Jalisco, Mexico

By a letter of intent dated 25 August 2006, the Company paid \$5,000 and was granted the right to enter into an option to explore and acquire certain concessions located in the State of Jalisco, Mexico. On 11 January 2007 the Company entered into a definitive option agreement, amended subsequently, whereby the Company must complete the following:

(i) The number of warrants is expressed in equivalent number of common shares, which may be issuable upon exercise of the warrants.

On 29 May 2009, the Company issued 6,739,000 units on a private placement at Cdn\$0.10 per unit for gross proceeds of Cdn\$673,900. Each unit consisted of one common share and one common share purchase warrant. Each warrant allows the holder to acquire one additional common share for a two year period at an exercise price of Cdn\$0.20 in the first year and Cdn\$0.50 in the second year. The Company paid agents commissions of Cdn\$10,000 and other costs relating to the placement of Cdn\$27,475.

On 20 August 2008, the Company issued 3,400,166 units on a private placement at Cdn\$0.30 per unit for gross proceeds of Cdn\$1,020,050. Each unit consisted of one common share and one common share purchase warrant. Each warrant allows the holder to acquire one additional common share for a two year period at an exercise price of Cdn\$0.50 in the first year and Cdn\$0.75 in the second year. The Company paid agents commissions of Cdn\$66,600.

The Company used the Black-Scholes model to allocate the proceeds of these unit offerings between common shares and share purchase warrants and to value the agent's share purchase warrants using an estimated volatility of 61-76%, an estimated risk-free rate of 2.57% - 2.80%, an estimated dividend rate of 0.00% and an estimated life of the warrants of 2 years, respectively.

- (i) The number of warrants is expressed in equivalent number of common shares, which may be issued upon exercise of the warrants.
- (ii) Subsequent to the period end the Company extended the 26 August 2008 exercise period for the Cdn\$0.50 from 26 August 2009 to 10 October 2009.

e) Stock-based compensation

For the period ended 30 June, the Company issued stock options to its directors, officers, employees, and consultants and recognized stock-based compensation as follows:

	2009	2008
Total options granted	2,650,000	300,000
Average exercise price (in Cdn\$)	\$ 0.15	\$ 0.66
Estimated fair value of compensation	\$ 166,225	\$ 106,191
Estimated fair value per option	\$ 0.06	\$ 0.35

The fair value of the stock-based compensation to be recognized in the accounts has been estimated using the Black-Scholes Option-Pricing Model with the following weighted-average assumptions:

	2009	2008
Risk-free interest rate	1.58%	3.64%
Expected dividend yield	0.00%	0.00%
Expected stock price volatility	82.00%	60.00%
Expected option life in years	5.00	5.00

The Black-Scholes Option Pricing Model was created for use in estimating the fair value of freely tradable, fully transferable options. The Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the highly subjective input assumptions can materially affect the calculated values, management believes that the accepted Black-Scholes model does not necessarily provide a reliable measure of the fair value of the Company's stock option awards.

f) Contributed Surplus

Details are as follows:

	2009	2008
Balance - beginning of year	\$ 1,128,664	\$ 745,019
Stock-based compensation	169,820	282,836
Fair value of stock options exercised	-	(54,252)
Balance - end of year	\$ 1,298,484	\$ 973,603

11. Capital Disclosures

The Company is in the business of mineral exploration and has no source of operating revenue. The Company's short-term debt is provided by the principle directors and officers, and the Company has no long-term debt. Operations are financed through the issuance of capital stock. Capital raised is held in cash in an interest bearing bank account until such time as it is required to pay operating expenses or resource property costs. The Company is not subject to any externally imposed capital restrictions. Its objectives in managing its capital are to safeguard its cash and its ability to continue as a going concern, and to utilize as much of its available capital as possible for exploration activities. The Company's objectives have not changed during the year.

12. Financial Instruments

The Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities, due to related parties and notes payable. The fair value of these financial instruments approximates their carrying value, unless otherwise noted. At 30 June 2009 the Company held currency totalling Cdn\$266,000; US\$133,000; and Pesos\$4,000, which is exposed to currency risk given fluctuations in the prevailing exchange rates between the Canadian, US and Mexican currencies. Unless otherwise noted, it is managements' opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments.

The Company is exposed to currency risk by incurring certain expenditures and carrying certain cash balances in currencies other than the U.S. dollar. The Company does not use derivative instruments to reduce its currency risk.
